

	GUIDELINES	Version: 02
	CO-ANX-MEA-0001 Climate Change Management - Mitigation and Adaptation	Dec/2018 Page 1/2

Klabin established the following guidelines to be followed during the planning and operation of its activities, for the management of Climate Change aiming at the reduction of its Greenhouse Gas (GHG) emissions and adaptation to climate changes:

- Define responsibility for managing GHG emissions; and managing climate opportunities and risks;
- Prepare and keep updated the inventory of GHG emissions related to scopes 1, 2, and 3;
- Establish targets for GHG emissions and make them public through the Sustainability Report or other means that can be used;
- Assess the vulnerabilities of the business in face of Climate Change incorporated the company's global risk management, considering: (i) future climate scenarios; (ii) identification of risks and opportunities; (iii) assessment, planning and implementation of adaptive measures;
- Promote and encourage energy efficiency;
- Promote and encourage the company's adaptive capacity, seeking partnerships with stakeholders (governments, society, local communities, and customers);
- Consider the reduction and regulation of GHG emissions to combat the effect of Climate Change when designing new projects and processes;
- Promote and encourage the use of renewable fuels, seeking to reduce consumption of fossil fuels;
- To seek the reduction of GHG emissions related to the transportation of our products;
- To encourage technological innovation, Research and Development for GHG reduction related to our activities and development of solutions for mitigation of climate change impacts;
- Disseminate the Climate Change guidelines to stakeholders;
- Participate in forums and voluntary initiatives related to the theme that aim to discuss and propose best practices for the management of GHG emissions and adaptation to climate change.
